Angela Grey	Regionally Appropriate Witchcraft	As a witch who has lived and practiced in many different places, I've been struck by how profoundly one's craft can be shaped by the local landscape. Mountain witches tend to learn different spells than farm witches, and prairie witches move to different rhythms than their brothers and sisters on the coast. Nature rewards adaptability, and learning to recognize and honour these subtle influences can help you refine your craft in some interesting and unexpected ways.	No	0
Angela Grey	Long Hidden Friends	There's an old joke that Pagan faiths are "religions of the library," and when most of us want to read about our path, the siren call of the occult section can be irresistible. But there are some pretty great books lurking in other sections of the library that have some surprisingly pagan content. Most of these hidden gems will never show up on a pagan recommended reading list, but seeking them out is well worth the effort. Join us for some enthusiastic book reviews, and a few select readings, of treasures you may want to add to your shelf.	No	0
Angela Grey	Working with Imperfect Source Material	Digging into the origins of one's Pagan path can be a disillusioning experience for many people. You set out enthusiastically to read your source material, only to discover that its origins are questionable, its authors weren't saints, and some of the writing is pretty bad. It's enough to make some practitioners question their path, or even abandon it altogether. But if this material is approached with the right attitude and measured expectations, it's possible to acknowledge the flaws and avoid the pitfalls, while still uncovering the hidden gems beneath. This, in turn, will greatly support the concept of "Know Thyself and you will know the Universe and the Gods." Helmut	Metal and Magic	The role of the smith and metal within a pagan community both ritually and magically was a unique and very important one that spanned all cultures around the world. As a smith I need to know as much as why what I do creates an effective ritual tool as what it does. Therefore my research was a curious mix of science and mythology and produced and set of 'rules' of how magic works with metal. These rules allows the results of using metal with magic to be consistent and predictable. This is important because, while the ancients only had 7 metals to work with, we have over 200 and with this information we can predict how any metal will work magically.	No	0

ja sonier	Bad Pagan Poetry Competition	Anyone can write a halfway decent poem. A few can write truly ennobling and edifying works that inspire us all. But not all treasures gleam with an inner light. Bring forth your inner Vagon. This is a competition for the worst original pagan-themed poetry ever written. Write an original poem before or at fest. You will sign up for a slot. You will read us the poem at the appointed hour. We will judge the poem. Points will be awarded on presentation, pretension, appropriate brevity, misuse of literary devices, on whether it makes us laugh, cringe or, best of all, both. Mere mediocrity or poor performance or sloppiness will not suffice-your piece must be well and truly and deliberately awful.	No	0

Julie Desrosiers	The Treasure of Training: Accessible and Standardized Pagan Clergy Training	Those who are called to serve the folk and their gods as pagan clergy don't have much in the way of standardized training or education programs similar to their Christian or other religious counterparts.
